

How To Retrieve Benchmark Information

1. Click on **City Maps** link above. This opens up the City GIS map.
2. There are two ways to retrieve the benchmark information. You can search for a benchmark by number or street or view all of the city benchmarks at once.
 - A. Search for benchmark information by number or street name.

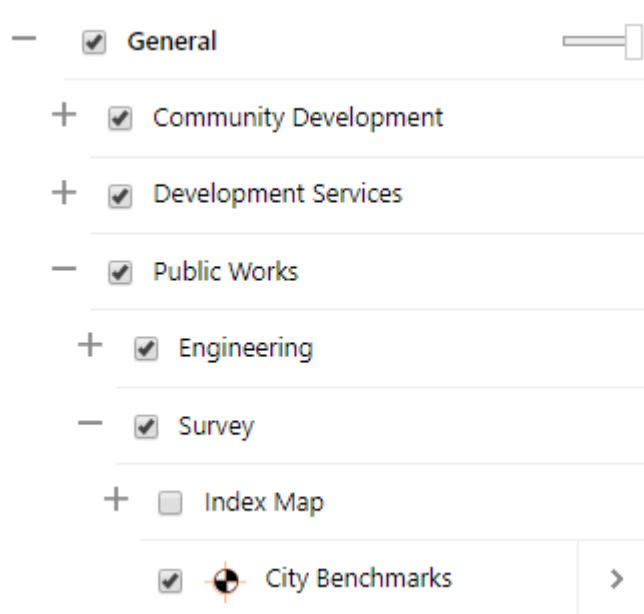

- a. Click on the **Find Features** tab.

A rectangular button with a light gray background and the text "Find Features" in a dark gray font.

- b. Click the **Fnd Benchmark** [Fnd Benchmark](#) button.
- c. Once you input the benchmark number or street name, click **Search**.
- d. The benchmark information is displayed on the left and the map zooms in to the location.

- B. Display all of the benchmarks in the City.

- a. The **Layers**  menu is displayed on the left side of the screen. Expand the tree **General > Public works > Survey** and check **City Benchmarks**.

- b. Benchmark symbols  will appear.
- c. Zoom into the area of town you are wanting benchmark information.

- d. Click on the **Identify** button  in the upper toolbar.
- e. Click on the benchmark symbol  you want to view the information.
- f. On the left side of the screen in the Identify Results menu, click on the arrow of City Benchmarks to display the benchmark information.
